

Updating Databases

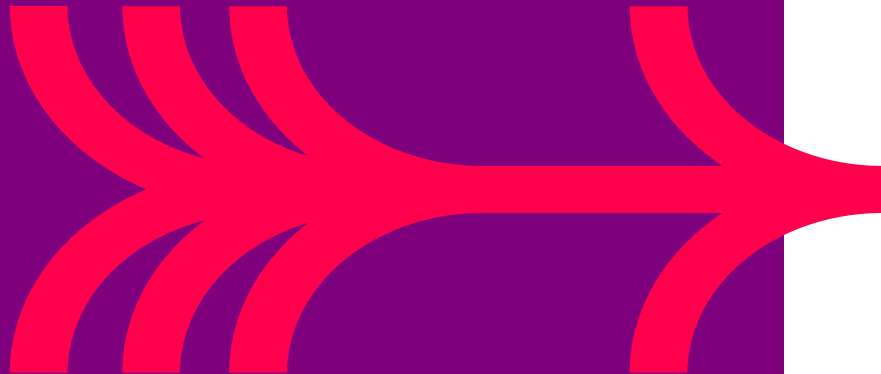

INSERTING NEW ROWS

```
import pyodbc
connectionString = r'DRIVER={ODBC Driver 13 for SQL  
Server};SERVER=.\SQLEXPRESS;DATABASE=northwind;Trusted_Connec  
tion=yes'
```

```
sqlStr = """INSERT INTO company  
    (company_no, company_name, tel, county, post_code)  
VALUES (5000, 'QA', '0207 888555', 'Devon', 'SE8 5ER')"""  
conn = pyodbc.connect(connectionString)  
cur = conn.cursor()  
cur.execute(sqlStr)
```

```
conn.commit()
```

```
conn.close()
```

CHANGING ROW / S

```
import pyodbc
```

```
connectionString = r'DRIVER={ODBC Driver 13 for SQL  
Server};SERVER=.\SQLEXPRESS;DATABASE=northwind;Trusted  
_Connection=yes'
```

```
sqlStr="""UPDATE company  
SET company_name='QA Ltd'  
WHERE company_no='5000'  
"""
```

```
conn = pyodbc.connect(connectionString)  
cur = conn.cursor()  
cur.execute(sqlStr)
```

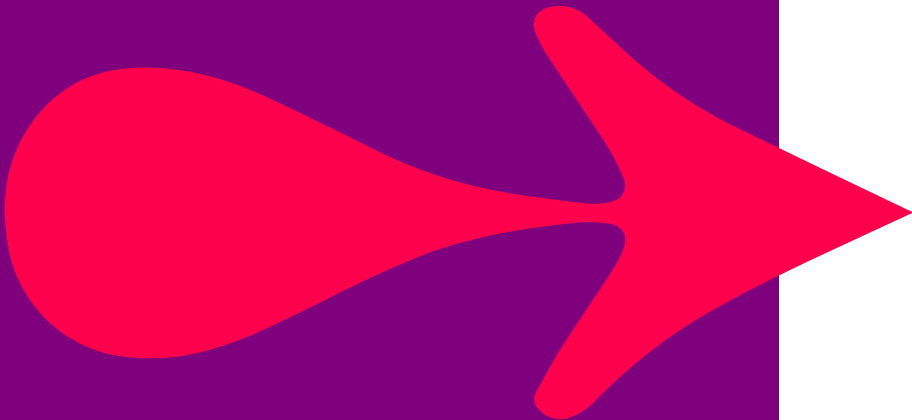

```
conn.commit()  
conn.close()
```

BETTER WITH FUNCTIONS!

```
def updateData(sql):  
    conn = pyodbc.connect(connectionString)  
    cur = conn.cursor()  
    cur.execute(sql)  
    conn.commit()  
    conn.close()
```

```
#-----Main code -----  
sqlStr="""UPDATE company  
SET company_name='QA Ltd'  
WHERE company_no='5000'  
"""  
updateData(sqlStr)
```

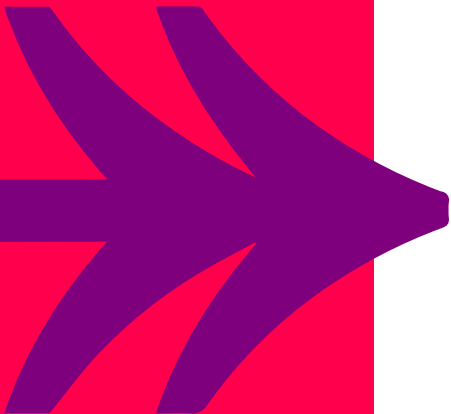

DELETING ROW / S

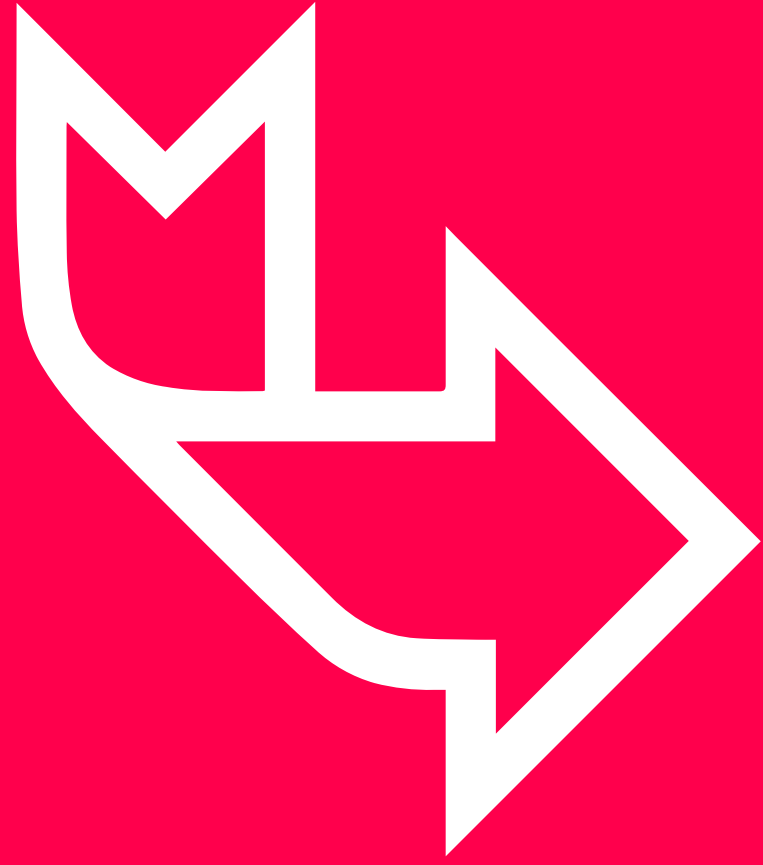

```
import pyodbc
connectionString = r'DRIVER={ODBC Driver 13 for  
SQL  
Server};SERVER=.\SQLEXPRESS;DATABASE=northwind;Tru  
sted_Connection=yes'
```

```
sqlStr="""DELETE FROM company  
WHERE company_no = 5000  
"""
```

```
conn = pyodbc.connect(connectionString)  
cur = conn.cursor()  
cur.execute(sqlStr)
```

```
conn.commit()  
conn.close()
```

Any questions?

Thank you!

Hope you enjoyed this learning journey!
